

PowerSchool Grade Codes Explained

“B” Codes - This is the code for 5th and 6th grade Encore classes.

“M” Codes- This is the code for 7th Grade Encore classes.

R2 - Is the code for the NYS Regent Exams. This is only used for our 8th grade students that took the Earth Science and/or the Integrated Algebra Regents.

T3 - Is the code we use for the Final Exam grades. This code is then used when calculating X5.

X5 - Is the code for the overall Final Grade for the entire year. Our teachers calculate this by adding up all 4 quarters and the Final Exam grade and dividing by 5. For example:

$$Q1-90 + Q2-95 + Q3-98 + Q4-92 + T3-87 = 462/5 \quad X5= 92.4$$

Honor Roll is calculated from the grades the student received during that quarter. If a student’s Encore class or classes ended within the quarter they will be also be included.
